Citi Call Takeaways: Emerging Biz Growth Acceleration with Better Margin – Raise EPS Estimates

CITI'S TAKE

We hosted an investor conference call for Chinasoft Int'l (CSI) mgmt today and encountered decent investor interest. Reiterate Buy on Chinasoft given its visible growth outlook and rev mix shifting to emerging biz with better margin, plus attractive valuation at ~18x 12m fwd PE (on 26% EPS CAGR in 2020-23E).

Citi call takeaways — Mgmt highlighted CSI has participated in the HarmonyOS construction since 2018 and is one of the 7 key players in the working committee of OpenAtom OpenHarmony (开放原子开源基金会), which makes CSI have the expertise in SDK (software development kit) and source code (源代码) to provide i) middleware to third parties; ii) hardware + software modules to smart device vendors (i.e., home appliance players) who like to adopt HarmonyOS and iii) IoT software development and Joint R&D. Huawei aimed to get 300mn smart devices installed with HarmonyOS by 2021E and the scale can gradually grow to 1bn+ units per mgmt. For smart device, CSI can charge Rmb10 for each HarmonyOS connect, aiming to have ~20% market share. CSI generated Rmb200mn rev related to HarmonyOS in 2020 and expects the rev to double each year in the following years.

Business outlook — Mgmt targets to achieve Rmb30bn revenue by 2023E (implied 29% rev CAGR in 2020-23E), within which 40% was contributed by emerging biz (implied 50%+ rev CAGR in 2020-23E), mainly driven by fast growth of cloud management service, enterprise digitalization, and HarmonyOS related biz. Huawei biz should remain solid with double-digit growth and overall GPM is expected to improve each year as rev mix shifting emerging biz with ~40% GPM (10ppts higher than legacy IT outsourcing biz). More takeaways on page 2.

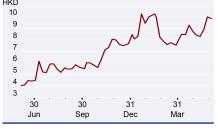

Implications — In view of faster emerging biz development and better margin outlook, we have raised our FY21E-23E earnings by 7-8%. Our new TP is adjusted to HK\$13.1 (from HK\$10.5) based on 22x 12mth Fwd PE (from 18x), which is set at 1.5SD above the historical average valuation given faster biz growth. Our TP implies 0.8x PEG based on 26% EPS CAGR in 2020-2023E.

More Takeaways from Management Call

Regarding HarmonyOS related biz model, CSI has taken 60% of the share in the R&D of Huawei's OS and related middleware. CSI can develop the middleware and charge related fees from the end-users in future.

As for **large customers**, mgmt highlighted that PingAn, Alibaba and Tencent will be the key accounts to reach USD1bn revenue by 2021E. More large customers are under development including China Mobile, Oppo, Vivo, etc.

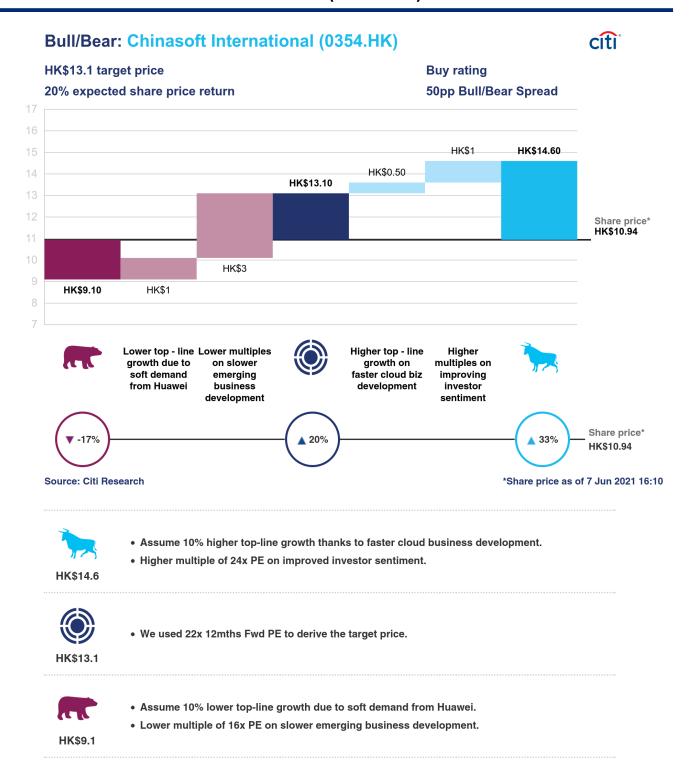

Looking into 2021E, mgmt targets to achieve \sim 30% yoy growth for both rev / net profit, with strong rev growth in 1Q21 (up \sim 50% yoy partly due to an easy base). Rev from Huawei and total number of employees should stay at double digits % growth.

Chinasoft International

Company description

Founded in 2000, Chinasoft International (CSI) is a leading IT services provider in China, chiefly offering industry IT solutions, IT outsourcing services, and cloud services to industries including finance, telecoms, internet, government, manufacturing, transportation, and education. CSI has built a strong customer base. CSI was listed on the HKex GEM Board in 2003 and transferred to the Mainboard Board in 2008.

Investment strategy

We have a Buy rating on Chinasoft International. We believe the company will enjoy strong secular growth, benefiting from China's digitalization trend. Potential growth drivers for Chinasoft include: 1) Huawei's continued R&D spending on product innovation; 2) IT service expansion, which should cover more large customers; and 3) rapid growth in the emerging cloud-management business.

Valuation

Our target price of HK\$13.1 is based on 22x 12mths fwd PE, set at 1.5SD above the historical nine-year (2011-20) average of 16x. We think the premium is justified by the shift in the company's revenue mix from its legacy businesses (IT solution and IT outsourcing) to emerging businesses (cloud intelligence services), which have stronger growth potential. It implies 0.8x PEG based on 26% EPS CAGR in 2020-23E at our target price.

Risks

Although our Quant model assigns a High Risk rating to the Chinasoft stock based on its share price volatility in the past 12 months, we believe such a rating is not warranted given the company's solid track record in revenue growth. Key downside risks that could impede the stock from reaching our target price include: 1) a greater-than-expected business impact if the US imposes stricter sanctions on Chinasoft's largest customer Huawei; 2) slower-than-expected growth in new businesses, including cloud and Jointforce; and 3) faster-than-expected labor cost inflation.

Guide to Citi Research Fundamental Research Investment Ratings:

Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.

Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.

Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Additionally, in certain circumstances Citi Research may suspend its rating and target price and place the stock "Under Review". "Under Review" status may be imposed when the rating has been suspended for (a) regulatory and/or internal policy reasons or (b) other exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and / or trading in the company's securities (e.g. trading suspension). In such situations, the rating and target price will show as "—" and "-" respectively in the rating history price chart. As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or tr

Catalyst Watch Upside/Downside calls:

Citi Research may also include a Catalyst Watch Upside or Downside call to highlight specific near-term catalysts or events impacting the company or the market that are expected to influence the share price over a specified period of 30 or 90 days. A Catalyst Watch Upside (Downside) call indicates that the analyst expects the share price to rise (fall) in absolute terms over the specified period. A Catalyst Watch Upside/Downside call will automatically expire at the end of the specified 30/90 day period; the analyst may also close a Catalyst Watch call prior to the end of the specified period in a published research note. A Catalyst Watch Upside or Downside call may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings-distribution-disclosure rules, a Catalyst Watch Upside call corresponds to a buy recommendation and a Catalyst Watch Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside or Catalyst Watch Downside call is considered Catalyst Watch Non-Rated (CWNR). For purposes of FINRA ratings-distribution-disclosure rules, we correspond CWNR to Hold in our ratings distribution table for our Catalyst Watch Upside/Downside rating system. However, we reiterate that we do not consider CWNR to be a recommendation. For all Catalyst Watch Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.
