VOLUNTARY ANNOUNCEMENT

Chinasoft and SiliconFlow Reach Strategic Cooperation Agreement to Jointly Drive Innovation in AI Computing Power and Intelligent Applications

Chinasoft International Limited (hereinafter referred to as “**Chinasoft**” or “**the Company**”) releases this announcement as a voluntary announcement to let the public know the latest information of the Company.

The Company is pleased to announce that on June 21, Chinasoft signed a strategic cooperation agreement with Beijing SiliconFlow Technology Co., Ltd. (hereinafter referred to as “**SiliconFlow**”). The partnership aims to jointly develop solutions that empower enterprises in their digital and intelligent transformation through the synergy of computing acceleration and full-stack AI services.

The joint solution between Chinasoft and SiliconFlow comprises four core platforms. Enterprise High-Performance AI Platform Integrates heterogeneous computing power with vector databases, graph databases, and search engines; unifies the model training and deployment process; and enables efficient knowledge utilization through prompt engineering. This helps enterprises build domestically developed high-performance AI platforms, accelerate the implementation of intelligent applications, and strengthen the foundation for digital intelligence. Model Serving Platform provides a fast, closed-loop process from model selection to deployment, significantly improving delivery efficiency. Knowledge Base Management Platform centrally manages knowledge assets, ensuring access security and application efficiency. Intelligent Agent Application Development Platform significantly lowers development thresholds, speeds up time-to-market, and facilitates the large-scale deployment of intelligent agents in both internal and external enterprise scenarios.

The solution adopts a ‘three-stage, nine-step’ AI professional service methodology, deeply optimizing customer model development efficiency and performance with the DeepSeek large model to accelerate intelligent deployment. During project implementation, SiliconFlow will provide products and related technical support, while Chinasoft will take charge of project execution and the customized development of surrounding AI applications, ensuring successful project delivery. Leveraging their joint capabilities in software-hardware coordination, a nationwide service network, and integrated solutions, Chinasoft and SiliconFlow are committed to ensuring platform security, stability, and domestic adaptation. This effectively lowers the barriers to enterprise intelligent transformation and drives the efficient realization of digital intelligence outcomes.

In the future, Chinasoft and SiliconFlow will continue to deepen their strategic collaboration, helping enterprises seize AI opportunities, accelerate the large-scale application of technologies, and drive intelligent transformation across key industries including energy, finance, government services, transportation, manufacturing, and public utilities.

About SiliconFlow

SiliconFlow is an innovative technology company focused on the infrastructure of Artificial General Intelligence (AGI). Positioned as a platform service provider for generative AI computing infrastructure, the company is dedicated to offering leading AGI computing capabilities to global enterprises and individual users. Its offerings include, but are not limited to, generative AI computing platforms and inference acceleration products and services. Through technological innovation, SiliconFlow aims to reduce the cost and complexity of large model applications and accelerate the democratization of AGI.

By order of the Board
Chinasoft International Limited
Dr. Chen Yuhong
Chairman and Chief Executive Officer

Hong Kong, 23 June 2025

As at the date of this announcement, the Board comprises three executive Directors, namely Dr. Chen Yuhong (Chairman and Chief Executive Officer), Dr. He Ning (Vice Chairman) and Dr. Tang Zhenming, two non-executive Directors, namely Dr. Zhang Yaqin and Mr. Gao Liangyu, and three independent non-executive Directors, namely Dr. Lai Guanrong, Professor Mo Lai Lan and Mr. Yeung Tak Bun J.P..
